SUMMARY

Software Engineer specializing in backend and full-stack development, with production experience building and deploying scalable REST APIs, authentication systems, and containerized applications for real client. Passionate about building reliable and scalable software systems. Open to relocation and available for immediate joining.

EDUCATION

- St. Thomas College of Engineering and Technology** Mattanur, Kerala, India
 - Bachelor of Technology - Computer Science & Engineering; CGPA: 8.07/10.00* *September 2022 - May 2026*
 - Relevant Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, Object-Oriented Programming*

SKILLS

- Languages:** Python, JavaScript, Java, C/C++, SQL, GO, HTML, CSS
- Backend & APIs:** FastAPI, Flask, Node.js, Express.js, REST APIs, JWT, OAuth2, RBAC, Microservices
- Frontend:** React.js, Tailwind CSS
- Databases:** MySQL, PostgreSQL, MongoDB, Redis
- Cloud & DevOps:** AWS, Docker, Docker Compose, Nginx, GitHub Actions(CI/CD), Linux, Prometheus, Grafana,
- CS Fundamentals:** Data Structures & Algorithms, System Design, OOP, SDLC
- Testing & Tools:** Git, GitHub, Postman, pytest, Unit Testing, Integration Testing, Code Review

EXPERIENCE

- Kerala Vision Broadband Limited** Kannur, Kerala
 - DevOps Intern* *May 2025 - June 2025*
 - Internal Automation Platforms:** Built DNS Management and Network Backup tools (React, FastAPI, MongoDB) deployed via Docker Compose, automating manual DNS record handling through cron-scheduled Python scripts.
 - Security & Reliability:** Implemented RBAC and JWT authentication across production REST API endpoints; automated network configuration backups using Netmiko and Python cron jobs, with Google Drive and WhatsApp API integration for cloud storage and failure alerts.
- Self-Employed** Remote
 - Freelance Software Engineer* *July 2025 - Present*
 - Distribution Management System:** Designed and developed a full-stack Distribution Management System for Kannur Vision using FastAPI, React, MySQL, Docker, JWT, Prometheus, and Grafana. Built an end-to-end device lifecycle platform featuring role-based workflows, inventory tracking, approvals, defect and return management, helping improve operational visibility, reduce financial leakage, and streamline device distribution across the organisation.
 - STEP4ECO (UK):** Built and deployed the production website for a UK Government ECO4 energy-efficiency provider using React.
 - RIO Agreements Library:** Built the RIO Agreements Library for KCCL using HTML, CSS and JavaScript

PROJECTS

- TRACIENT - Blockchain-Based Income Traceability System**
 - Hyperledger Fabric, Node.js, python, React, MongoDB, XGBoost*
 - Platform Architecture:** Architected a distributed platform for transparent welfare eligibility verification using Hyperledger Fabric, Node.js, React, and MongoDB, enabling immutable wage tracking across worker, employer, administrator, and government.
 - ML Fraud Detection Pipeline:** Engineered machine learning services using Random Forest and XGBoost to classify BPL/APL households and detect anomalous income patterns across 30,000+ worker profiles.
 - Security & Recognition:** Built secure REST APIs with JWT authentication, RBAC, and UPI/QR payment integration, with Go chaincode implementing permissioned smart contracts for blockchain transaction validation; recognized with the Best Paper Award (RAET'26).
- ContextOS - Privacy-First AI Memory Engine**
 - FastAPI, LangChain, ChromaDB, Kuzu, Ollama, React*
 - RAG Pipeline:** Designed a privacy-first RAG pipeline combining ChromaDB vector search and Kuzu graph traversal over locally-running LLMs (Llama 3.2 / Mistral via Ollama), enabling fully offline personal knowledge management with zero cloud dependency.

LEADERSHIP & ACHIEVEMENTS

- Technical Lead – VBlaze STM** : Led a team of 20+ student developers in building websites for college events, organized technical workshops, and was recognized for delivering high-quality event platforms.
- Best Paper Award – RAET 2026:** Received the Best Paper Award for **TRACIENT**, a blockchain-based income traceability system presented at the RAET 2026 National conference.
- Data Structures & Algorithms:** Solved 100+ LeetCode problems .
