SUMMARY

Software Engineer with **hands-on experience deploying production-grade systems** and publishing **award-winning research (Best Paper, RAET'26)**. Built machine learning fraud detection models achieving **98.52% accuracy** across **30,000+ profiles**. Experienced in designing scalable backend systems using **Python, FastAPI, microservices, REST APIs, Docker, and CI/CD**. Targeting **Software Engineer / backend** roles where **Python, FastAPI, system design, and agile** delivery are core.

EXPERIENCE

DevOps Intern | Kerala Vision Broadband Limited

May 2025 – June 2025

Kannur, Kerala

- Engineered **DNS Management** and **Network Backup microservices** (React + FastAPI + MongoDB) deployed across **Multi-NOC sites** via **Docker Compose**, reducing manual DNS handling by **80%** through cron-scheduled **automation**.
- Implemented **RBAC, JWT** authentication, and environment-based config hardening; secured **RESTful API** endpoints across production infrastructure — tested via **Postman** and peer **code review**.
- Automated versioned **network config backups** across Multi-NOC sites via **Netmiko** + Python **cron jobs**; integrated **Google Drive API** for storage and **WhatsApp API** for real-time failure alerts, eliminating ~15 hrs/week of manual ops.

Independent Contractor — Full Stack Developer

2024 – Present

Remote | Client Referral Based

- Built and deployed **step4eco.uk** — production **React + REST API** app for a **UK Gov't ECO4** energy-efficiency provider; improved lead-capture conversion through structured inquiry flows. (Sep 2025)
- Developed and deployed a full-stack **Distribution Management System** for Kannur Vision using **React, FastAPI, MySQL, and Docker** on **AWS**; implemented **JWT authentication** and **RBAC**, supporting **20+ daily active users**. (Mar 2026)
- Delivered **Exam Hall Seat Arrangement System** (St. Thomas College, Dec 2024) and filterable **RIO Agreements Library** for **KCCCL** (Jan 2026) — both in production; managed **Git** version control and **pull request** workflows.

PROJECTS

TRACIENT — Blockchain Income Tracer | FastAPI, Hyperledger Fabric, React, Python, Docker, AWS | GitHub 2025

- Architected **blockchain** income traceability **microservice** (**Hyperledger Fabric, FastAPI, MongoDB, Docker Compose**); deployed to a local server with **Nginx** reverse proxy and **GitHub Actions CI/CD** pipeline.
- Developed **APL/BPL classifier** (**Random Forest**, 94% accuracy) and **income anomaly detector** (**XGBoost**, **98.52% accuracy**) detecting fraud patterns across **30,000 worker profiles** validated via **pytest & unit tests**.
- Implemented **UPI payment + QR flow** with **JWT, RBAC** across user roles, and automated **Hyperledger** ledger sync; designed for **horizontal scalability** — awarded **Best Paper, RAET'26**.

Railway Platform Monitoring System | Python, OpenCV, YOLOv8, Roboflow | GitHub

Nov 2024 – Mar 2025

- Built **real-time** object detection safety system using **YOLOv8 + OpenCV** to classify pedestrian risk zones; annotated and versioned 4,000+ image **dataset** via **Roboflow** — presented at **RAET'25**.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C/C++, HTML/CSS

Backend & Databases: FastAPI, Flask, Node.js, REST APIs, MySQL, PostgreSQL, MongoDB, Redis

Frontend: React.js, Tailwind CSS, TypeScript

Cloud & DevOps: AWS (EC2, S3), Docker, Nginx, GitHub Actions, CI/CD, Git, Linux

AI/ML: Scikit-learn, XGBoost, Random Forest, YOLOv8, OpenCV, NumPy, Pandas

Security: JWT, RBAC, OAuth2, Hashing, Encryption

Testing & Practices: pytest, Postman, unit testing, code review, Agile, system design, microservices

EDUCATION

St. Thomas College of Engineering and Technology

Mattanur, Kerala

B.Tech in Computer Science & Engineering | CGPA: 8.00/10

Sep 2022 – Apr 2026

ACHIEVEMENTS, AWARDS & LEADERSHIP

- Best Paper Award** — TRACIENT, RAET'26 National Conference on Recent Advancements in Engineering and Technology.
- Led **15+ member engineering team** at Vblaze Tech Club; delivered **IGNITE** and **XTASY** fest websites serving **500+ participants** — managed sprint planning, **code reviews**, and deployment using **React.js** and **Tailwind CSS**.
- Selected for **Young Innovators Program (YIP)** by Government of Kerala
